It provides users diversified applications. It can be used on JBOD storage mode to install 3 independent HDD/SSD to exchange data with each other, or take out the hard drive and tray to other external boxes, so that users can carry it to the office when go out. Or iT2300 **can match with a RAID card to set to 2.5" RAID-0/1**, and match with its 3.5" JBOD mode, to let the data backup safely at any time, and ensure that the data can be stored for a long time.

The iT2300 comes with the 2×2.5" and 1×3.5" hot swappable metal drive trays with lock to secure the drive in place and to protect the data safely. Besides, it is equipped with the 4cm silent fan for the better heat dissipation and the usage of hard drives extension. It is the dual function storage offering the backup data security and also for on the go data transport. It is a choice JBOD internal storage and suitable for file servers, industrial computers, and workstations.
